SPECIAL FEATURES

Omega 670 Straight Mineral Gear Oil is the high-purity lubricant engineered specially for high-performance applications where supplements and additives can't be used.

- **Omega 670** is 100% straight paraffinic gear oil designed for optimum results in high-purity applications.
- **Omega 670** stands up to acids, heat and wear that ordinary napthenic oil can't handle.
- **Omega 670** provides exceptional protection against metal corrosion and oxidation.

OUTSTANDING PROPERTIES

Omega 670 is the straight mineral gear oil that:

- Is completely resistant to water and moisture.
- Operates at both ultra-low temperatures, where ordinary oils begin to drag, and higher temperatures, where ordinary oils become unstable.
- Has high resistance to foaming – withstands sustained gear action without aerating.
- Assures freedom from gum and other deposits.

USE FOR

Omega 670 is the result of a unique blending procedure whereby the finest quality, solvent-refined paraffinic oil is gelled with hyper-purity and dewaxed cylinder-quality mineral base oils that provide the superb standard of lubricity that ordinary gear oils are simply unable to attain.

Use **Omega 670** for all gear applications where straight mineral, non-EP gear oils are required.
